📊 CRT Bias Scanner Pro v4.0

Quick Start User Manual

🎯 What is CRT Bias Scanner?

The **CRT Bias Scanner Pro** is a multi-timeframe market scanner that analyzes 16 assets simultaneously using the **Candle Range Theory (CRT)** to identify potential trading biases based on 4-hour candle patterns.

Key Features:

- 📈 Scans 16 assets in real-time
- ⚡ Performance-optimized with configurable scan frequency
- 🎨 5 professional color themes
- 📊 Live statistics dashboard
- 🔔 Smart alert system
- 🕐 Trading session visualization

🚀 Quick Setup

Step 1: Add to Chart

1. Open TradingView and select any chart
2. Click Indicators → Search for "CRT Bias Scanner v4"
3. Add to your chart

Step 2: Initial Configuration

1. **Position**: Top Right (default) - change if needed
2. **Scan Frequency**: 5 minutes (recommended for balance)
3. **Theme**: Choose your preferred color scheme

4. **Enable Scanner**: ✅ (should be checked)

📖 Understanding the Signals

CRT Bias Indicators:

Icon	Bias	Description	Action
↑	**BULL**	Low sweep with close above	Consider long positions
↓	**BEAR**	High sweep with close below	Consider short positions
⚡	**S&D**	Both high & low swept (Seek & Destroy)	Volatile - wait for direction
○	**WAIT**	No clear bias	No action - wait for setup

How CRT Works:

- Compares current 4H candle with previous candle
- Identifies liquidity sweeps (highs/lows taken)
- Determines bias based on close position after sweep

⚙️ Settings Guide

🔥 Performance & Alerts

- **Scan Frequency** (1-60 min): How often to update
  - 1-5 min: Day trading (high CPU)
  - 5-15 min: Swing trading (balanced)
  - 15-60 min: Position trading (low CPU)
- **Enable Alerts**: Get notifications on bias changes
- **Bull/Bear Only**: Filter alerts by direction

🎨 Visual Settings

- **Themes Available**:
  - **Dark Pro**: Professional dark theme

    - **Light Pro**: Clean light theme
    - **Matrix**: Terminal green style
    - **Ocean**: Blue aquatic theme
    - **Monochrome**: Grayscale minimal
- **Table Size**: Compact / Normal / Large
- **Compact Mode**: Shows shortened symbols (EUR vs EURUSD)

💱 Symbol Configuration

Default includes 16 major assets:

- **Forex**: EUR, GBP, JPY, CAD, AUD, NZD, CHF pairs
- **Indices**: NAS100, DOW30, SP500
- **Commodities**: Gold, Silver
- **Crypto**: Bitcoin, Ethereum

Customize any slot with your preferred symbols

🕐 Trading Sessions

Visual session boxes on chart:

- 🗽 **New York**: 13:00-22:00 UTC
- 🏰 **London**: 07:00-16:00 UTC
- 🗾 **Tokyo**: 00:00-09:00 UTC
- 🌉 **Sydney**: 21:00-06:00 UTC

📊 Reading the Scanner Table

```
┌──────────────────────────────────────┐
│   CRT BIAS SCANNER PRO               │ ← Title
│   🟢 ACTIVE | 14:35:22               │ ← Status & Last Scan
├──────────────────────────────────────┤
│ Symbol │ Bias │ Symbol │ %Δ    │ ← Headers
├────────┼──────┼────────┼───────┤
│ EURUSD │  ⬆   │ GOLD   │ +1.2% │ ← Asset & Signal
│ GBPUSD │  ⬇   │ BTC    │ -0.5% │
│  ...   │ ...  │  ...   │  ...  │
├──────────────────────────────────────┤
│  ↗ 5 | ↘ 3 | ⚡ 2 | ○ 6              │ ← Statistics
└──────────────────────────────────────┘
```

Table Components:

- **Symbol**: Asset being scanned
- **Bias**: Current CRT signal (⬆⬇ ⚡ ○)
- **%Δ**: Price change percentage
- **Statistics**: Count of each bias type

💡 Trading Tips

Best Practices:

1. **Confluence**: Use with your existing strategy
2. **Multiple Timeframes**: CRT scans 4H, confirm on your trading timeframe
3. **Session Alignment**: Best signals often at session opens
4. **Risk Management**: CRT shows bias, not entry/exit points

Optimal Settings by Trading Style:

Style	Scan Freq	Alerts	Sessions
Scalping	1 min	ON	OFF
Day Trading	5 min	ON	ON
Swing Trading	15 min	ON	ON
Position Trading	30-60 min	OFF	OFF

🔔 Alert Setup

1. Right-click on chart → "Add Alert"
2. Condition: "CRT Bias Scanner v4"
3. Configure:
   - **Bull Alerts**: Long opportunities
   - **Bear Alerts**: Short opportunities
   - **Both**: All directional changes

🛠️ Troubleshooting

Issue	Solution
Scanner not updating	Check "Scanner Active" is enabled
High CPU usage	Increase scan frequency (10-15 min)
No signals showing	Verify symbols are correct format
Sessions not visible	Enable "Show Sessions on Chart"
Table too small/large	Adjust "Table Size" setting

📈 Advanced Features

Debug Mode

Enable to see:

- Current timeframe

- Bar count
- Next scan countdown
- Technical diagnostics

Performance Optimization

- **Cached Results**: Reduces server requests
- **Time-Based Scanning**: Updates only when needed
- **Dynamic Requests**: Optimizes multi-symbol queries

🎯 Strategy Integration

Entry Confirmation:

1. Wait for CRT bias signal (⬆ or ⬇)
2. Confirm on your trading timeframe
3. Check session timing
4. Enter with your normal strategy

Risk Management:

- CRT shows bias, not stop loss levels
- Use ATR or structure for stops
- Consider opposite bias as potential reversal

📝 Quick Reference

Keyboard Shortcuts:

- **Alt + Click**: Move table position
- **Double Click**: Open settings

Color Coding:

- 🟢 Green: Bullish bias
- 🔴 Red: Bearish bias
- ⚡ Yellow/Gray: Neutral/S&D
- ⚪ Gray: Waiting/No bias

🚨 Important Notes

1. **4H Timeframe**: CRT analyzes 4-hour candles regardless of your chart timeframe
2. **Lookback**: Uses previous two 4H candles for analysis
3. **Not Financial Advice**: Use as one tool in your analysis
4. **Internet Required**: Needs connection for multi-symbol data

---

📞 Support

- **Version**: 4.0
- **Compatibility**: TradingView Pine Script v5
- **Updates**: Auto-updates with script
- **Documentation**: Check script comments for technical details

---

Happy Trading! May the bias be with you! 📊✨
